Section	Change	Explanation of Change
I	Added Table of Contents	The Table of Contents is included to assist the reviewer. No changes have been made.
I.A.	This Permit authorizes DOE and MOC (the Permittees) to manage , store; and dispose contact-handled (CH) and remote-handled (RH) transuranic (TRU) mixed waste at WIPP, and establishes the general and specific standards for these activities, pursuant to the New Mexico Hazardous Waste Act (HWA), NMSA 1978, §§74-4-1 <u>et. seq.</u> (Repl. Pamp. 1993) and the New Mexico Hazardous Waste Regulations, 20.4.1.100 NMAC <u>et. seq.</u>	This change allows the acceptance of RH TRU mixed waste at WIPP. Removal of the prohibition to manage TRU Mixed waste is necessary to allow the Permittees to manage (i.e., screen, verify, and as necessary examine) in coming waste to determine compliance with the TSDF-WAC prior to storage and/or disposal. This is a global change.
I.D. 1.a.	<u>Remote-Handled TRU Mixed Waste</u> <u>Remote-handled transuranic mixed waste means transuranic mixed waste with a surface dose rate of 200 millirem per hour or greater. (Pub. L. 102-579 (LWA), as amended by the National Defense Authorization Act for Fiscal Year 1997 Pub. L. 104-201).</u>	This defines RH TRU mixed waste.
I.D.8.	<u>Waste Receipt</u> <u>Waste receipt is defined as the time incoming waste shipments reach the WIPP facility and the Permittees assume control of the shipment from the transporter by signing the manifest.</u>	This defines the time at which the Permittees take control of the waste by signing the manifest. This date is important since waste may be in staging areas no longer than 10 days from the date of waste receipt.
I.D.9.	<u>Staging Areas</u> <u>Staging Areas are defined as portions of the WIPP facility that are designated in the HWFP for processing of verified and examined waste or unverified and unexamined waste pending completion of the Permittees verification activities as described in Permit Attachment B7. Waste may be held in staging areas for ten (10) days from the date of receipt. Non-compliant waste may be held in staging areas for sixty (60) days from the date the non-compliance was discovered.</u>	This defines staging areas as those are where waste undergoing verification and examination may be held for up to 10 days. Waste which is deemed to be non-compliant may be held in these areas for sixty days from the date of waste receipt.

Section	Change	Explanation of Change
I.D.10.	<p><u>Containment Pallet</u></p> <p><u>A containment pallet is defined as a device which will be capable of staging a minimum of one 55-gallon drum or 85-gallon drum, or 100-gallon drum or a standard waste box, or a ten-drum overpack and will have internal containment for up to ten percent of the volume of the containers on the containment pallet. A containment pallet may also be referred to as a container handling pallet.</u></p>	<p>This defines a pallet which may be used to hold waste undergoing verification and examination.</p>
I.D.11.	<p><u>Remote-Handled Packages</u></p> <p><u>Remote-Handled Packages means both CNS 10-160B and RH-TRU 72-B shipping containers and their contents. These are also known as casks.</u></p>	<p>This defines the two types of packages approved for shipment of RH waste to WIPP.</p>
